

Amendments to the Specification:

Please amend the specification to delete the sequence listing filed on May 12, 2006, and to insert the substitute paper and computer-readable copies of the sequence listing being filed concurrently herewith into the application.

Please amend the specification at page 34, lines 8-9, to replace “[SEQ ID NO:43]” with “[SEQ ID NO:44]” as follows:

CATGTTTTCGGCCGAGCCACCACCTTTGGTGCAMNNMNNMNNMNNGTCA
CCACGMNNMNNMNNMNNGCAGGTTTCAGAGTGAGAATAG 3' [SEQ ID NO:4344]

Please amend the specification at page 39, Table 9, to insert the phrase --and translated peptide sequence-- after the word “Sequence” and to insert --SeqID No: 43-- prior to “Glu” as follows:

Table 9. Example 15, n=10, DNA Sequence and translated peptide sequence of a randomized template fixed β -hairpin mimetic Phage library

Example Seq. ID		R ¹	Cys	P1	P2	P3	P4	P5	P6	
Ex.15	SeqID No: 42	GAA	ACC	TGC	NNK	NNK	NNK	CGT	GGT	GAC
	<u>SeqID No: 43</u>	Glu	Thr	Cys	X	X	X	Arg	Gly	Asp
		P7 NNK X	P8 NNK X	P9 NNK X	P10 NNK X	Cys TGC Cys	R2 ACC Thr	AAA Lys		

X: randomized amino acid positions
Cysteines are linked by a disulfide bridge
